To request Telehealth/VC or Audioline, **please click on the video or telephone icon** next to the session title on the website for more information on how to register.

Building on the anti-homophobia work that Calgary Sexual Health Centre has been doing since the 1990s, this workshop defines and examines the differences between sex, gender, and sexual orientation. We discuss the root causes of homophobia, biphobia, transphobia, and heterosexism, while looking at both media messaging and our culturally constructed views of gender and the impact this can have on clients and coworkers. Participants will leave with practical strategies for creating a safer, more inclusive and respectful work environment. They will also learn about additional community resources and referrals.

Level I: This session presents an overview of LGBTQ and creating positive environments, and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addictions and Mental Health Portfolio and Psychiatry (CAAMHPP) of Alberta Health Services in partnership with The Calgary Sexual Health Centre.
