This presentation expands on the background and conceptualization of FASD by focusing on presentation throughout the lifespan. A discussion of practical learning and behavioural management strategies will be provided, as well as various resources for families

Level I: This session builds on an overview of FASD, and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services in partnership with Renfrew Educational Services.
