Boys and Girls Learn Differently

How gender differences influence learning and behaviour

Michael Reist, B.A., B. Ed., M.A. (T)

Register: <http://community.hmhc.ca/sessions/?p=online>

Session available until: July 1, 2018

The author of *Raising Boys in a New Kind of World* presents how gender differences have a profound influence on learning and behaviour. Boys' brains and girls' brains develop and operate very differently. Current brain research has revealed fascinating differences between the way males and females think and communicate. The implications for teaching and raising boys and girls are profound. Teachers and parents of both genders will benefit from this entertaining and enlightening workshop.
