ICE is specialized law enforcement team that targets those who make, possess, and distribute child pornography as well as those who lure children online for a sexual purpose. Compelling evidence will be provided to show how often this is happening in our communities. With technology and social media being both a challenge and opportunity, there is an urgent need for collaborative approach on intervention, prevention, education, and enforcement.

Level I: This session presents an overview of child exploitation, and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services in partnership with CPS.
