Improve your knowledge of youth over-the-counter and prescription drug use, misuse and abuse. Information provided will include prevalence of use, drugs of abuse (including fentanyl), signs and symptoms of misuse/abuse, the link to mental health concerns, a harm-reduction approach, and available resources.

Level I: This session presents an overview of fentanyl and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services and YMCA Wellness Centre.
