To request Telehealth/VC or Audioline, **please click on the video or telephone icons above or**  
next to the session title on the website for more information on how to register.

In a world where “screen time” is rapidly increasing, how we interact with our children is changing. We will present the revised guidelines on digital media use from the American Academy of Pediatrics (released in October 2016) with a focus on the impacts of screen time on the development of language in the preschool years.

**Level I:** This session presents an overview screen time and speech development, and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services in partnership with Preschool Speech and Language Services, AHS.
