The Schizophrenia society of Alberta offers community education presentations to educate our community on the disorder, its symptoms and what those living with it experience.

Community education Presentations are unique in that the program presenters are living with schizophrenia themselves, they share their personal experiences in order to combat the stigma around the illness, with the goal of creating a more inclusive and educated society.

**Level I:** This session will look at the schizophrenia and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services in partnership with The Schizophrenia Society of Alberta.
