How come my child is suddenly refusing to go to school, sleep alone or is afraid to be away from me? Could this be anxiety? This workshop will give insight into how anxiety works in children, how do we recognize it and what can we do? This presentation will cover children pre-school through to school-age.

Level I: This session presents an overview of childhood anxiety and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services, Early [Childhood & Perinatal Mental Health - AHS](#) & [Family Connections Parent Link Huntington Hills](#)
