****Register: <http://community.hmhc.ca/>****

To request Telehealth/VC or Audioline, **please click on the video or telephone icons above or** next to the session title on the website for more information on how to register.

Trauma can significantly impact a child, and those caring for them are often left with questions about how to best help. The impact of trauma on neurological development and attachment system will be explored, and how this presents in children's behaviours. Caretakers will be given key strategies to help children impacted by trauma, and appropriate resources will be suggested.

*** Session is presented LIVE from Edmonton, if you wish to view the session there please register for the Edmonton location on the CES website. Thank you**

Level I: This session presents an overview of childhood trauma and how it effects attachment and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addiction, Mental Health and Psychiatry Program (CAAMHPP) of Alberta Health Services in partnership with Institute of Child Psychology.
