Improving emotional health and well being

Working Together to Prevent Technology Based Child Sexual Abuse

Cynthia Muszynski, MSW, Director of Programs and Integrated Practice
Sandi Pineda-Selva, MA, Manager of Prevention Services
Luna Child and Youth Advocacy Centre

This session will explore how technology is changing the impacts of child sexual abuse including issues such as sextortion, sharing of intimate images and child sexual abuse material. Participants will also learn how to recognize, respond and report child abuse emphasizing the community's collective role in child abuse prevention.

Learning Outcomes:

- 1) Participants will understand the risks associated with technology-based child abuse
- 2) participants will learn about how technology is being used in child sexual abuse
- 3) participants will learn how to recognize, respond and report child abuse
