Improving emotional health and well being

Adolescent Brain Development and Navigating Parent-Teen Relationships

Erin Dawson-Meyers, PHEc (Professional Human Ecologist)

BSc in Human Ecology, majoring in Family Ecology from the University of Alberta

Over 10 years of experience working with children and youth

Adolescence is a magical time when children enter a period of huge growth and change. Bodies and brains change, emotions become more volatile, friends become more important, and the parent-child relationship morphs into a parent-teen relationship. In this session we will discuss the adolescent brain, how to support healthy brain development, promoting resilience, and navigating the ways that your relationship with your teen will evolve as they slowly but surely become little adults.

FREE WEBINAR

October 26, 2021
6:00 – 8:00PM
