Trauma Informed Care Approaches – Translating Trauma-Informed Principles Into Action

Ashley Meagher BA CYC & Stephanie Sands BSc. Psychology,
Rocky View School Division & MHCB Stepping Stones to Mental
Health

This free community-focused session explores the role that traumatic experiences can have in people's everyday life. The focus of this information is to offer a generous approach by implementing skills that help community adopt a trauma - informed approach in the relationships and roles they have. Trauma is part of human experience and working from a trauma - informed lens acknowledges the prevalence of trauma within the population. As such, adults can anticipate that they will often serve individuals who have experienced or been affected by trauma. The hope of sharing this information is that together we can create a kinder more generous community for everyone.
