Managing Anxiety in Children and Adolescents with Neurodevelopmental Disorders (NDDs)

Thomas Qiao, MSc, Research Coordinator, Department of Psychiatry, University of Calgary

Noah Furlani, MSc, Research Coordinator, Department of Psychiatry, University of Calgary

Dr. Kara Murias, MD PhD FRCPC, Pediatric Neurologist, Alberta Children's Hospital;

Assistant Professor, Department of Pediatrics and Clinical Neuroscience, University of Calgary

This presentation will:

- Identify the signs and symptoms of anxiety in children and adolescents with NDDs (e.g., AD/HD, ASD, Tics and Tourette's Disorders, Fragile X Syndrome).
- Examine the current evidence on pharmacological and psychosocial treatments for anxiety in individuals with NDDs.
- Present a new clinical trial study that examines the use of sertraline for treating anxiety disorders in children and adolescents with NDDs.
